Updating Product Data Using a USB Flash Drive
You can use a USB flash drive to transfer your updated product labels file from your computer to your printer.

To save the product data file to your computer, please do the following:

1. Insert USB flash drive into the USB port of the computer.

2. Click on "Culvers.dat" file link on the Culver's website. A ".zip" file should appear on the screen.

3. Left click to open the file.

4. Left click the product data file titled "Culvers_menu.dat".

5. Right click the highlighted file and click on "Copy".

6. Navigate to the computer's desktop, right click, and a menu will appear.

7. Right click the word "Paste" (the file should appear on the desktop).

8. Right click on the "Culvers_menu.dat" file.

9. A menu will appear, scroll to "Send to", and left click.

10. Highlight "Removable Disk" and left click.

Follow these steps to load the product data to the printer:

1. Insert the USB flash drive into the USB port on the side of the printer.

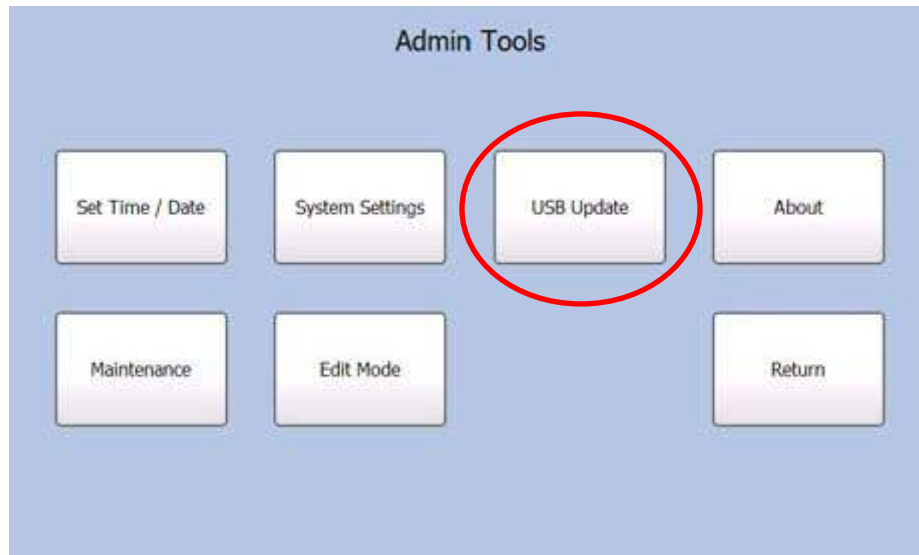

**2.** Press the **Tools** button in the upper right hand corner of the screen.

3. Press **Admin**.

4. Enter the Admin password then press Enter. The default password is 1234.
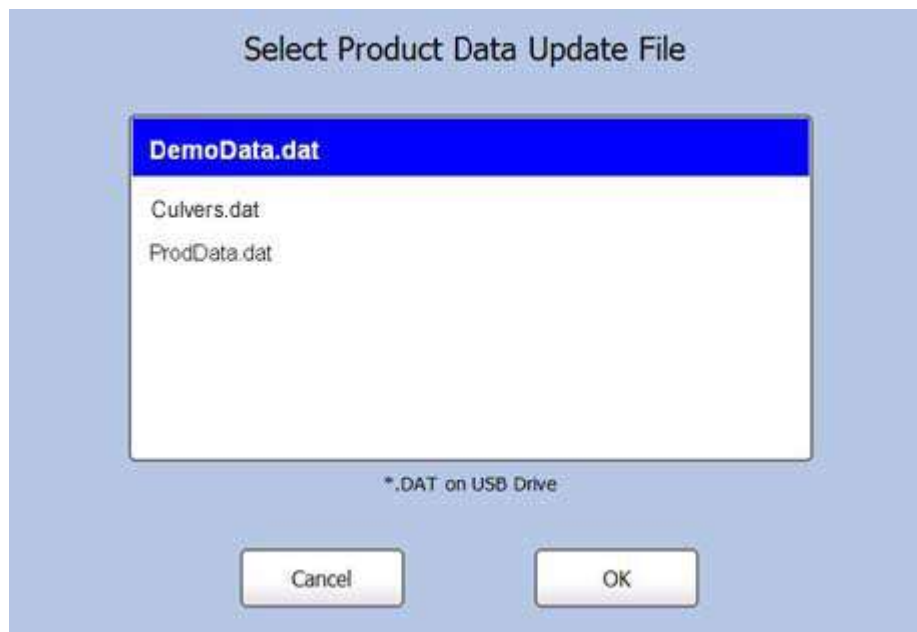

5. Press **USB Update**.

6. Press **Update Product Data** to update the data files.

Note: If there is more than one Product Data file stored on the USB flash drive, select the desired file to install and press **OK**.

7. An alert will appear that the file is uploaded. Press **OK** to continue.

8. Remove the USB flash drive from printer.
