Avery Dennison® Monarch® Pathfinder® 6059 Solution

RETAILER CHALLENGES WITH CURRENT PRICE MARKING SOLUTIONS

Price-marking and inventory management are two essential pieces of the retail industry. Having the right solution in place can save you significant time and money. However, today’s solutions can be vulnerable to inaccuracies, missing markdowns, and lack the ability to accurately manage inventory across the retail supply chain, all of which can have a huge impact on store margins. The Pathfinder 6059 solution, with Android operating system, solves for these retail challenges.

TWO MODELS FOR THE PATHFINDER 6059:

1. **RFID** – Provides the capability to encode the RFID inlay that is in each label with product specific information that can then be read with an RFID reader.
2. **Non-RFID** – All the benefits of the existing Pathfinder Solution.

ALL-IN-ONE – SCAN, PRINT, APPLY

The Pathfinder 6059 Solution:
- Combines scan, lookup, and label application all with one device.
- Powered by the Android operating system – enabling enhanced security, flexibility and IT/user acceptance.
- The all-in-one design means the operator only needs one hand to hold the scanner, leaving the other hand free to move items or hold tags, etc. This essentially eliminates the risk of inaccuracies in price-marking and allows the operator to work at a significantly faster pace.

WHAT IT CAN DO FOR YOUR STORE:

The Pathfinder 6059 allows you to:
- Enable associates to perform markdown and promotional labeling with greater speed and accuracy than 2-piece solutions or conventional red-pen techniques.
- Significantly increase price-marking efficiencies boosting employee productivity, meaning more time for your staff to serve customers.

NOW WITH RFID OPTION – SCAN, ENCODE, PRINT, APPLY

The Pathfinder 6059 RFID offers portable RFID encoding, empowering retailers to become 100% RFID enabled if desired.
- Add RFID to all items in store.
- Add RFID labels to existing merchandise not tagged at source.
- Add RFID labels to returned merchandise.
- Add RFID labels to clearance items that are not currently RFID encoded. This enables real-time inventory counts, allowing retailers to sell brick and mortar markdown merchandise online (via omni-channel store fulfillment).
- Existing benefits of the Pathfinder solution (markdowns, item marking) remain.

THESE ENHANCED CAPABILITIES RESULT IN:
