# USING THE SCREEN PROTECTOR

Installing the Screen Protector

1. Remove the mask film from the screen protector. Place a piece of adhesive tape on one corner of the film and quickly pull back.

2. Install the masked side facing the printer's touch screen display. The unmasked side is the writing surface.

3. Clean both sides of the screen protector and the printer display with a soft cloth moistened slightly with distilled water and allow to dry. **Do not** use household cleaners to clean the printer.

Warning: Failure to clean the display and screen protector may scratch or damage your printer display.

4. Slide the edge of the screen protector between the printer and the display.

5. Bow the screen protector slightly and slide the other edge of the screen protector between the printer and display on the opposite side.

6. Use your thumbs to gently guide the screen protector into place at the bottom of the printer display until it covers the display and lays flat.

Note: Be careful not to bend or crease the screen protector.

AVERY DENNISON

Removing the Screen Protector

1.   Use a piece of adhesive tape to grab one corner of the screen protector.
2.   Pull back to remove the screen protector from the printer display.

♦   If you see dust or lint on your touch screen display, remove the screen protector, clean it and the display with a soft cloth moistened slightly with distilled water and allow to dry before reinstalling. **Do not** use household cleaners to clean the printer.

♦   "Oil spots" may appear if the screen protector is installed wrong side up. Remove the screen protector, turn it over, and reinstall.
